

# 152 Professional Why Nail

## Fast-Cure Solvent-Based Construction Adhesive Sealant

It is a solvent-based construction adhesive sealant formulated with synthetic rubber for professional use, suitable for a wide range of bonding applications in flooring, construction, renovation, woodworking, furniture manufacturing, and DIY projects.

<b>Fast Grab</b>	<b>Great Adhesion</b>	<b>Good Wetting</b>	<b>Non-Sag</b>	<b>No Oozing</b>	<b>Slight Elasticity</b>	<b>Easy Repair</b>

**Optimized solvent system** evaporates faster — so the adhesive **tacks off** and grabs sooner.

**Floor Stair:** handle foot traffic shortly after installation.

**Deco. Wall Panel:** holds panel fast without support.

**Rich rubber-based polymer content.**

High **cohesive strength** after cure, which translates into **strong shear performance** during service.

**Floorboards and wall panels** are able to stay secure and perform reliably.

**Effective surface penetration.**

It **wets** the surfaces properly and **transfers well** to both sides of bonded objects.

Hence, it's more forgiving on **rough or imperfect** substrates, and easier to work with on site.

**It doesn't sag** — even on vertical or sloped surfaces.

When applied in **blobs**, it **doesn't flatten out**.

Ideal for bonding floorboards, skirting or wall panel on **uneven subfloor / wall** — **bridging gaps and reducing hollowness**.

**It stops flowing** the moment **pressure is released** from the trigger, preventing **unwanted oozing** from the cartridge.

This helps ensure a **neater and more precise application** on site.

It retains **slight elasticity** after cure, which allows bonded materials like floorboards to **expand and contract** naturally.

A **stiff adhesive** cannot accommodate **movement**, which may lead to **gaps forming** — particularly when **floorboards** are not fully **acclimatized** before installation.

It delivers a secure bond with **balanced rigidity**, allowing **controlled removal** when needed.

When rectification is required, overly **rigid adhesives** can **crack, chip, or damage the substrate** during removal.

Code	Description	Color	Content	Packing
152	Professional Why Nail	Light Brown	300 ml / Cartridge	24 Cartridges / Carton

**Applications:** compatible with most construction materials like wood, plywood, corkboard, MDF, gypsum board, FRC board, SPC, WPC, certain plastics, metal substrates like aluminium and GI Steel, concrete, masonry, glass, ceramics, tiles, bricks, stones, veneer, etc.
