

113 Antifungal Silicone Sealant

100% Neutral Silicone Sealant for Bathroom / Kitchen / Wet / Hygiene Areas

A neutral-curing, 100% silicone sealant with antifungal protection, ideal for sealing joints in wet and hygienically sensitive environments such as bathrooms, kitchens, laundry rooms, basements, cold rooms, F&B processing facilities, healthcare institutions, and pharmaceutical manufacturing areas. Its antifungal performance is verified to **ASTM G21**.

The sealant offers excellent adhesion to a wide range of substrates, smooth tooling properties, and cures with atmospheric moisture to form a durable, waterproof, permanently flexible rubber. It provides outstanding resistance to weathering, UV exposure, vibration, moisture, ozone, temperature extremes, airborne pollutants, and many cleaning detergents and disinfectants.

Code	Description	Color	Content	Packing
111T	Antifungal Silicone Sealant	Translucent	300 ml / cartridge	24 cartridges / carton
111W		White		

Applications: Suitable for wet, damp, and hygiene-sensitive environments where high humidity and poor ventilation promote fungal growth.
