

142 Cold Room Mastic

Non-skinning Insulation Panel Mastic Sealant

A permanently soft, non-skinning mastic designed for cold rooms, refrigerated containers, and insulated panel systems. It seals butt joints between adjacent panels to prevent hot/cold air transfer, improving thermal efficiency and reducing energy loss.

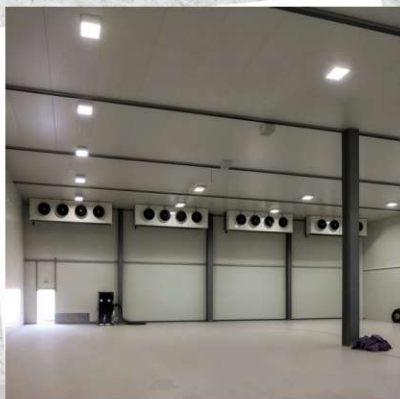

It offers excellent resistance to water vapour transmission and strong adhesion to a wide range of substrates, including PU, PIR and EPS insulation panels, as well as metal, glass, timber, masonry, and many plastics.

Its permanently non-skinning nature allows it to reseal if the bond is disturbed, making it ideal for cold room installations that may require panel disassembly, maintenance, reconfiguration, or relocation.

Code	Description	Color	Content	Packing
N142300	Cold Room Mastic	Off White	300 ml / cartridge	24 cartridges / carton

Applications: cold room insulation panels, refrigeration unit construction, concealed butt joints.
